With a background in engineering, constant curiosity and continuous learning I enjoy working in all aspects of the UX process. I believe that life is all about solving problems, telling stories and making a difference. My objective is to leverage my technical skills and business acumen to solve new and exciting challenges that impact the world.

Experience

Jul '17 -
Present

+

Telus, Canada

Senior UI/UX Developer

Build and design various internal/external web applications and tools to increase employee efficiency using both AngularJS and Angular2.

Collaborate with the product team to make user stories, wireframes and high fidelity clickable prototypes in Adobe XD.

Create libraries and components to bring consistent design across various product offerings. Implement front-end and wrap existing backend via RESTful web services.

Participate in building OpenAPI specifications to bridge the gap between front end and backend development.

Ensure high quality code by writing comprehensive reusable code. End to end feature ownership by continuous testing and release.

Nov '16 -
Jul '17

+

Istuary Innovation Lab, Canada

UI/UX Developer

Designed information architecture, reusable UI components and implemented an application for an advanced mass storage application using AngularJS.

Participated in the whole life cycle of product: requirement gathering, designing documents, prototyping, implementing new features, providing support during release activities and bug fixing.

Aug '10 -
Mar '14

+

Infosys, India

UI/UX Developer

Customized Finacle banking software as per the customer requirements using Finacle scripting language for the backend and HTML/CSS and JavaScript for the frontend implementation.

Created and documented various proof of concept for future reference.

Conducted various classroom and virtual training sessions on technical topics on core banking and Finacle application. Mentored trainees and hosted many knowledge transfer sessions.

Education

Sep '15 -
Dec '16

+

Master of Digital Media

Centre for Digital Media, Vancouver, BC, Canada

Jun '06 -
Apr '10

+

Bachelor of Computer Engineering

PES Institute of Technology, Bengaluru, Karnataka, India

Creative

Interaction design, Ideation, Concept evaluation, Wireframing, Data visualization - Charts, Dashboard, Low to high fidelity prototyping, User persona, User stories, User flow

Technical

Requirements gathering, Detail oriented, Responsive web design, Peer programming, Usability testing, Bug fixing, End-to-end feature ownership and testing

Programming

HTML5, CSS3, JavaScript, TypeScript, Bootstrap, AngularJS, Angular 2+, JSON, RESTful APIs integration, OpenAPI specification, Web services

Tools

DESIGN

Adobe Experience Design (XD), Adobe Illustrator, Figma, Sketch, Axure, Zeplin

DEVELOPEMENT

VS Code, IntelliJ, Sublime, Slack, GitLab, Jira

MANAGEMENT

Agile methodologies - Scrum, Presentation skills, Open communication, Time management
